```
minio gateway COMMAND [COMMAND FLAGS | -h] [ARGUMENTS...]
```

COMMANDS:

azure Microsoft Azure Blob Storage.

s3 Amazon Simple Storage Service (S3).

gcs Google Cloud Storage.

Google
Cloud Storage

Amazon S3

Azure Blob Storage

Minio Gateway features

- Serve as S3 compatible proxy for different back-ends
 - Azure
 - GCS
 - S3
- Support full S3 API
 - Multi-part uploads
 - Any SDK (Minio, AWS, etc.)
 - Any language
- Transparent for client application
- Minio browser for gateway

Multi-cloud strategy

- Single API to access any object
- Universal access via **mc** (minio client)
- Deployment
 - Multiple gateways on single server
 - Multiple servers each with own gateway
- Caching
 - Cache objects on local disk
 - Faster delivery / create your own CDN
 - Allow savings on eg bandwidth costs
